THE Index is arranged according to subjects on the plan of the *Index du Répertoire Bibliographique* (published by MM. Gauthier-Villars, pp. 93, 2nd edition, 1898; about 2/-).

# INDEX

TO THE

# MATHEMATICAL GAZETTE

No. 77, JANUARY, 1909—No. 90, JANUARY, 1911.

COMPILED BY MISS A. J. TEAL.

1. Local Branches.
2. Articles, etc.
3. Correspondence.
4. Mathematical Notes.
5. Reviews and Short Notices of Books.
6. Queries and Answers.
7. Errata and Addenda.

---

## EXPLANATORY REMARKS.

IT is not possible to give in full the subjects under the thousand or so subdivisions which appear in the *Index*; but for the sake of those who do not possess the *Index* we give the subjects under the principal letters. This will amply suffice for the majority of our readers.

A. Algebra; Theory of Equations.
B. Determinants; Linear substitutions; Elimination; Invariants and Covariants; Complex Quantities.
C. Differential and Integral Calculus.
D. Theory of Functions; Algebra of Continued Fractions.
E. Definite Integrals. . . .
F. Elliptic Functions. . . .
G. Hyperelliptic Functions. . . .
H. Differential Equations . . . Finite Differences, Recurrent Series.
I. Arithmetic. Theory of Numbers.
J. Permutations and Combinations; Probabilities; Calculus of Variations. . . .
K. Elementary Geometry and Trigonometry; Geometry of point, line, plane, circle, and sphere; Perspective; Descriptive Geometry.
L[1]. Conics.

L². Quadrics.
M¹. Algebraical Plane Curves.
M². Algebraical Surfaces.
M³. Algebraical Gauche Curves.
N. Complexes and Congruences; Connexes; Systems of curves and surfaces; Enumerative Geometry.
O. Infinitesimal and Kinematic Geometry.
P. Transformations; Homography; Homology; Polar Reciprocals.
Q. Geometry of $n$ dimensions; non-Euclidean Geometry.
R. Kinematics; Statics; Dynamics.
S. Hydrostatics.
T. Mathematical Physics.
U. Astronomy.
V. Philosophy and History of Mathematics. Biography. Methodology.
X. Graphic Calculation.

## LOCAL BRANCHES.

| | Page |
|---|---|
| Formation of Local Branches. | 122 |
| North Wales Branch. | 73, 89, 170, 193, 299 |
| Southampton Branch. | 122, 169, 300, 345 |
| London Branch. | 193, 289 |

## ARTICLES, Etc.

| Type. | Title. | Author. | Page |
|---|---|---|---|
| V. 1. 10. | Report of the Council for 1908. | | 41 |
| V. 1. 10. | Meetings of Educational Societies in January, 1910. | | 121 |

## MATHEMATICAL NOTES.

| Type. | No. | Subject. | Author. | Page |
|---|---|---|---|---|
| A. 1. | 317 | Suggested Symbols. | John H. Lawlor. | 283 |
| A. 1. | 323 | On certain Summations. | Anon. | 335 |
| A. 1. | 325 | Note on "Variations." | W. D. Evans. | 336 |
| A. 1. a. | 328 | Note on the factorization of the trinomial $x^2+px\pm q$. | C. C. Wiles. | 338 |
| A. 1. a. | 312 | On $\sum_1^n n(n+1)$. | S. Andrade. | 206 |
| A. 2. a. | 329 | A mnemonic. | John H. Lawlor. | 338 |
| A. 3. g. | 320 | The solution of the equation $x^{2n+1}+ax^2-b=0$. | Anon. | 334, 363 |
| D. a. | 290 | Erratum | | 88 |

| Type. | No. | Subject. | Author. | Page |
|---|---|---|---|---|
| D. 2. | 313 | The limit $\left(1+\frac{1}{n}\right)^n$ where $n \to \infty$. | J. Lister. | 207 |
| D. 6. b. | 319 | To find an approximation to the large positive root of a certain equation. | G. H. Hardy. | 333 |
| E. 5. | 308 | On a certain form of Definite Integral. | A. H. Anglin. | 187 |
| I. | 305 | Irrational Number. | Philip E. B. Jourdain. | 165 |
| K. | 343 | On some Problems and Results. | M. T. Naraniengar. | 389 |
| K. 1. | 289 | Note on Euclid. | E. J. Nanson. | 88 |
| K. 2. c. | 334 | Feuerbach's Theorem. | J. M. Child. | 358 |
| K. 2. d. | 333 | (1) The radical axis of the circum-circle and the Brocard circle. (2) The relative positions of these circles. | H. L. Trachtenberg. | 357 |
| K. 2. e. | 337 | The bisectors of the angles of a triangle $ABC$ meet the opposite sides in $X$, $Y$, $Z$. On a property of a circle $XYZ$. | John H. Lawlor. | 360 |
| K. 3. c. | 297 | Euc. 1. 47. | W. Gallatly. | 143 |
| K. 5. | 298 | Orthologic triangles. | W. Gallatly. | 143 |
| K. 5. d. | 330 | To inscribe a triangle in a given triangle so that the sum of the squares of its sides shall be a minimum. | G. R. Thompson. | 339 |
| K. 6. | 322 | Note on the bisectors of the angles between two given straight lines. | E. H. Smart. | 335 |
| K. 6. a. | 338 | On the Centre of a Circle in Trilinears. | John H. Lawlor. | 361 |
| K. 7. d.; $M^1$. e. $\delta$. | 339 | A property of the Complete Quadrangle. | W. P. Milne. | 386 |
| K. 8. 2. | 304 | To construct a quadrilateral which shall be inscribable in a circle, having given the four sides. | H. T. Gilmore. | 165 |
| K. 10. b. | 293 | Simple proof of the harmonic property of pole and polar of a circle. | Solidus. | 140 |
| K. 11. a. | 316 | On orthogonal circles. | A. Lodge. | 282 |
| K. 11. c. | 324 | To prove that if a pentagon and a decagon be inscribed in a circle, the difference between the squares on their sides is the square on the radius of the circle. | F. J. W. Whipple. | 336 |
| K. 12. a. | 301 | Constructions as tests in Examinations. | Cecil Hawkins. | 162 |

| Type. | No. | Subject. | Author. | Page |
|---|---|---|---|---|
| K. 20. b. | 311 | Fundamental Trigonometrical Expansions. | F. J. W. Whipple. | 205 |
| K. 20. c. | 300 | A Simple Device. | | 162 |
| K. 21. a. | 318 | Note on the problem: "Given a parallelogram, construct a parallel to a given line through a given point." | J. M. Child. | 283 |
| K. 21. d. | 296 | Approximate construction for a radian. | J. M. Child. | 142 |
| K. 21. d. | 309 | A Geometrical Construction for $\pi$. | F. J. W. Whipple. | 188 |
| L¹. | 343 | On some Problems and Results. | M. T. Naraniengar. | 389 |
| L¹. 3. | 342 | The equation of the bisectors of the angles between the general pair of straight lines. | H. L. Trachtenberg. | 388 |
| L¹. 4. a. | 340 | Representation of the power of a point with respect to a conic. | F. J. W. Whipple. | 388 |
| L¹. 4. 7. | 336 | Tangents and foci of conics. Alternative proof of standard theorems. | F. J. W. Whipple. | 360 |
| L¹. 14. a. | 302 | On the foci of conic inscribed in a quadrilateral. | R. F. Davis. | 162 |
| L¹. 15. f. | 341 | See pp. 288 *et seq.* and p. 406, Vol. III. | H. L. Trachtenberg. | 388 |
| L¹. 17. e. | 315 | Systems of conics whose director circles have a common radical centre. | E. J. Nanson. | 281 |
| M¹. a. | 332 | The cubic $xy^2+4a^3=0$. | M. T. Narayana Iyengar. | 340 |
| M¹. h. | 335 | Geometrical meaning for the triad: $(x_1, y_1, z_1)$, $(x_1, \omega y_1, \omega^2 z_1)$, $(x_1, \omega^2 y_1, \omega z_1)$. | W. P. Milne. | 359 |
| M¹. 8. g. | 295 | Graphic construction of the parabolic and hyperbolic curves $y=x^n$. | E. J. Nanson. | 141 |
| M¹. a. | 327 | The cycloid. | M. T. Narayana Iyengar. | 337 |
| R. 8. $\beta$. | 299 | Euler's Equations deduced from Gyroscopic Resistance. | H. Crabtree. | 161 |
| R. 9. a. | 307 | Snow sliding down a roof. | G. H. Bryan. | 166 |
| V. a. | 294 | Tangents to conics. | G. H. Bryan. | 140 |
| V. 1. a. | 314. | On $\frac{a}{b}=\frac{c}{d}=\frac{a+c}{b+d}$. | C. S. Jackson. | 281 |
| V. 1. a. | 321 | Suggested Symbols. | F. C. Boon. | 334 |
| V.; R. 4. | 303 | Traps in Examinations. | M. E. J. Gheury. | 163 |
| X. 4. a. | 331 | An interesting figure. | A. Lodge | 340 |
| X. 4. a. | 291 | A Geometrical Representation of the Sum of an Infinite Geometric Series. | R. M. Milne. | 138 |

| Type. | No. | Subject. | Author. | Page |
|---|---|---|---|---|
| X. 4. a. | 292 | A Geometrical Construction for the Sum of a Geometrical Progression. | F. J. W. Whipple. | 139 |
| X. 4. b. a. | 310 | Squared paper solution of the equation $a\cos\phi+b\sin\phi=c$. | A. C. Dixon. | 205 |
| X. 4. b. $\beta$. | 326 | Graphical solution of a biquadratic. | Anon. | 337 |
| X. 7. | 306 | "The slide rule for babes and sucklings." | G. H. Bryan. | 165 |
